

## Thermometers for Pt100 RTD probes

The XS thermometers Pt100 RTD, are studied from an ASIC (Application Specific Integrated Circuit) microprocessor which offers numerous innovative features while maintaining, at the same time, an easy to use interface.

Good quality / price ratio, ideal for temperature measurements in the laboratory and in the field.

### Temp 7 Basic For Pt100 RTD probes from -200 to + 999 °C

- With microprocessor
- MIN / MAX values
- Measurement stability indicator
- Permanent memory
- Externally calibratable
- Auto power-off and hold function
- Low battery indicator
- Self diagnosis messages
- Splash-proof IP56 protection
- Protective boot in rubber with support
- Certifiable from National metrology center

Splash-proof keypad

#### How to select right temperature probe for your application

On temperature measure, first selection is based at type of temperature probe. When temperature probe is selected thermometer model is linked.

**Pt 100:** very accurate temperature probe, with high linearity. Indicated as primary thermometer and for very accurate measure. Medium speed response. Suitable for negative value until -200°C . Suggested for laboratory application or laboratory reference.

**NTC:** accurate in short range of temperature: -50...+150°C. Simple and basic application as food , HVAC or general temperature measure. Medium speed response.

**K thermocouple:** large range of temperature applications up to 1.100°C. Most suggested for high temperature value over 300°C. Very fast response and very flexibility on construction: small size available for special application. Negative temperature value reading for short time. Suggest for all industrial application where is necessary large range of measure.

**T thermocouple:** short range of temperature applications up to 300°C. Very fast response and very flexibility on construction: small size available for special application. Negative temperature value reading without any problem. Suggest for all pharmaceutical and food application.

Temperature measurement in air conditioning system

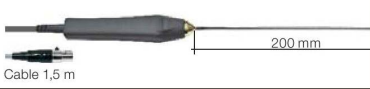

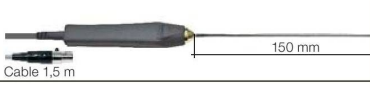

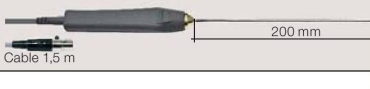

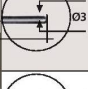

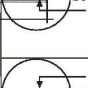

Perfect for food application

#### How to order

Code	Description
50011012	Temp 7 RTD Portable thermometer for PT 100 RTD probes, provided <b>without</b> temperature probe. Complete with carrying case.

**PT 100 PROBES FOR THERMOMETERS Temp 7 RTD – Temp 70 RTD**

Code	Model	Design	Tip	Measuring range °C	Certification range °C	t <sub>90</sub> sec.	Precision class
51000202	PT56L	 200 mm Cable 1,5 m		-50 +400	-50 +300	30	A
51000212	PT56C	 200 mm Cable 1,5 m		-50 +400	-50 +300	120	A
51000222	PT56P	 150 mm Cable 1,5 m		-50 +400	-50 +300	60	A
51000232	PT56A	 200 mm Cable 1,5 m		-50 +250	-50 +150	60	A
51000242	PT56L 1/5 DIN	 200 mm Cable 1,5 m		-50 +400	-50 +300	30	1/5 DIN
51000252	PT56 TFE	 100 mm Cable TEFLON/TEFLON 3 m IDEAL FOR OVENS AND FREEZERS		-100 +300 CABLE INCLUDED	-100 +250	30	A
51000262	PT56/500	 500 mm Cable 1,5 m		-50 +400	-50 +300	60	A
51000272	PT56/1000	 1000 mm Cable 1,5 m		-50 +400	-50 +300	60	A
